Lesson 1.1 – Polynomials: Adding & Subtracting, Multiplying & Expanding

I. Warm-up: Combining Like Terms & Writing Algebraic Expressions

(See Background Knowledge pages 5-9 in the Red 9/10 textbook)

1. Simplify, where possible, by collecting like terms:

a.	3 <i>a</i>	+	4 <i>a</i>	=

b.	11b	-b	_
υ.	$\perp \perp \nu$	υ	_

c.
$$5 + x + 2 =$$

d.
$$2ab + 3ab =$$

e.
$$3x^2 + 2x =$$

Word	Meaning	Symbol
sum		
difference		
product		
quotient		

- 2. Write a mathematical expression for the following written expressions:
 - a. The sum of 6 and a =
 - b. The difference between c and d, where d > c =
 - c. The mean of p, q, and r =
- 3. Convert the following phrases into mathematical form:
 - a. 18 more than a number
 - b. 7 less than a number
 - c. Double a number
 - d. Double the sum of a number and 7

II. Adding & Subtracting Polynomials

Recall the distributive property:

Expand and simplify the following:

a.
$$2(3x - 1) =$$

b.
$$-3x(x+2) =$$

c.
$$3(x+5) + 2(4-x) =$$

d.
$$y(3y-1) - 3y(2y-5) =$$

Multiply and simplify the following expressions.

1.
$$7(3x^2 + 6x + 5) - 7(3x^2 + 3x + 2) =$$

2.
$$(5x^2 + 4x + 7) + (2x^2 - 2x - 6) =$$

3.
$$2(9x + 1) - 9 =$$

4.
$$3(9y + 3) - 3(5y + 3) =$$

5.
$$1-2(5-(9y-5))=$$

6.
$$2x^2 + 4 - [9(x^2 - 2) + 7] =$$

What are polynomials?

Polynomials	Not Polynomials

Apply the distributive property on the product (a + b)(c + d)

Expand and simplify:

a.
$$(x+4)(x-3)$$

b.
$$(2x-5)(-x+3)$$

c.
$$(x+4)(x-4)$$

d.
$$(3x-2)(3x+2)$$

e.
$$(2x+1)^2$$

f.
$$(3-4y)^2$$

g.
$$(x+3)(x^2+2x+4)$$

h.
$$(x+1)(x-3)(x+2)$$

FOIL Method

$$(a+b)(c+d)$$

Differences of Squares Pattern

$$(a+b)(a-b)$$

Perfect Square Pattern

$$(a + b)^2$$

Practice on Your Own IV.

Multiply and simplify the following expressions.

1.
$$(4x-6)(4x+7)$$

2.
$$(5x - 3)(5x + 3)$$

3.
$$(5x+6)^2$$

4.
$$(1-2x)^2$$

5.
$$(7x + 7)(2x - 6)$$

6.
$$(x-7)(x^2+5x+2)$$

$$P(x) = 3x^3 - 5x - 4,$$
 $Q(x) = x^2 + 2x + 2,$ $R(x) = x^3 - 6$

$$O(x) = x^2 + 2x + 2$$
.

$$R(x) = x^3 - 6$$

Then evaluate

a.
$$P + Q =$$

b.
$$R(P + Q) =$$
